

Education

University of California Santa Barbara	Santa Barbara, CA	Expected 06/2024
- B.S. Computer Engineering, GPA: 3.93/4.00 Honors: Regents Scholar, Engineering Honors Program Activities: UCSB Archery Division (Chair/Secretary), SBHacks (Development Team)		

Experience

Software Engineering Intern	Salesforce — Redmond, WA	June 2023 – Sept 2023
- Engineered Action Center dashboard that allows users to view consolidated app alerts on product home page - Collaborated with team and designers to define Action Center functionalities, UI, and implementations from scratch - Developed extensive frontend using Aura and JavaScript, and backend using Java on top of Spring framework - Assisted in codebase optimization and maintenance on format inconsistency, duplication, and complexity reduction		
Software Engineering Intern	Salesforce — San Francisco, CA	June 2022 – Sept 2022
- Created input components (Aura/LWC, JavaScript, and Java) in product setup page to access data from Government Cloud users - Designed front and backend test using JUnit and Jest for new components		
Brighter Future Learning Center	Math Tutor — San Jose, CA	Aug 2019 – April 2020
- Mentored students on homework and assignments from Pre-Algebra to Calculus - Taught one-on-one and group lessons		

Projects

Procedure Tracking System (Senior Capstone)
- Worked in team to create a computer vision plus sensors solution that tracks users' progress through a list of steps - Optimized Computer Vision ML model (YOLOv7, YOLOv7-tiny) for the tracking system by experimenting with image augmentation, fine-tuning, few-shot learning, and edge detectors - Collected and labeled relevant tool data using CVAT - Created scripts on SLURM GPU clusters to pipeline training and testing - Implemented GUI using Tkinter, and worked with team to test model + GUI integration on Nvidia Jetson Orin

Passport Photo Formatter

- Format user-input image into standard U.S. passport photo dpi, size, and 4" x 6" layout
- Created responsive UI using **React.js** and **Bootstrap**, and implemented backend built with **Java Spring** framework
- Integrated **OpenCV** face detection to crop input images to face
- Hosted web application on **Heroku**

Web-Scraping File Transferer

- Built web-scraping application with Selenium and **Python Flask** to transfer and republish papers between archives

Skills

- Language: Python, Java, C++, JavaScript/HTML/XML/CSS
C, Verilog, Assembly (MIPS)
- Tools: Pytorch, Tensorflow, Jupyter, NumPy, Spring, Firebase, Flask, React, Node.js, Tailwind
MATLAB, ModelSim, Eagle, SPICE, Altera Quartus II, Keil
- Coursework: Machine Learning, Computer Vision, Deep Learning, Data Structures and Algorithms, Sensors and Peripheral Design, Digital Design Principle, Signal Analysis, Analog and Digital Circuits & Systems, Discrete Mathematics, Probability and Statistics, Differential Equation, Linear Algebra, Game Theory

Miscellaneous Interests: Star Wars, AR/VR, noodle soup, graphene energy, Soulslike, writing, languages
